

Scott Boddye

Identity Manager

Experienced IAM professional with over 8 years of IT management experience, specializing in identity access control, security, SaaS management, and compliance. Proven expertise in designing, deploying, and managing IAM systems to improve organizational security and compliance with industry standards like SOC II, GDPR, and HIPAA. Adept at leading cross-functional teams, automating onboarding/offboarding processes, and deploying security protocols to safeguard sensitive data.

SKILLS

Identity and Access Management (IAM)	Okta Administration (SSO, MFA)	Security Compliance (SOC II)	SaaS Management & Optimization
User Access & Role Management	IT Security & Risk Mitigation	On/Offboarding Automation	Vendor Management
MDM (Kandji, JAMF)	Incident Management	Process Automation	Cross-functional Collaboration

ACHIEVEMENTS

Spearheaded Okta IAM Deployment: Successfully implemented **Okta IAM** across multiple organizations, securing access for over **500+ users** and integrating **Single Sign-On (SSO)** and **Adaptive MFA**, enhancing security and user experience while reducing login complexities.

Led SOC II Compliance Initiatives: Directed **SOC II compliance** efforts by deploying **Vanta** for continuous security monitoring, ensuring audit readiness and maintaining high standards of data protection for sensitive company information.

Optimized SaaS Management: Conducted comprehensive **SaaS audits** and streamlined license management across **180+ applications**, resulting in **\$60K+ cost savings** through contract renegotiations and license optimization.

Optimized Role-Based Access Control: Developed and implemented role-based access control (RBAC) policies, ensuring appropriate access levels for users based on their roles, resulting in a 25% improvement in operational efficiency across SaaS environments.

Thanks for the detailed clarifications! I will now revise the job descriptions and include the correct information based on your feedback. This will also help build a more comprehensive library for future use.

Vendr (Acquired Blissfully) | July 2021 – January 2024

IT Manager / Senior IT Manager (Promoted)

- Led IT integration and SaaS consolidation post-acquisition of Blissfully, managing the full transition of IT systems and workflows.
- Spearheaded **SOC 2** compliance management at Vendr, transitioning the process to **Vanta** for continuous compliance monitoring.
- Scaled IT operations for the company, supporting Vendr's growth from ~150 employees to 450, before company downsizing.
- Built an internal help desk team and reduced reliance on external MSP services by managing all internal IT requests.
- Hired and managed a two-person IT support team located remotely, overseeing daily help desk operations.
- Automated onboarding and offboarding processes using **Okta** and **Kandji**, improving IT workflows and security for remote and in-office employees.
- Implemented **Okta IAM** for access management and **Kandji** for device security, streamlining the identity and access management processes.
- Administered **CrowdStrike** for endpoint protection across all company devices, ensuring robust security protocols were in place.
- Managed SaaS applications post-acquisition, optimizing over 180+ applications for effective usage and cost-saving.
- Led **Google Workspace** administration, managing the platform for seamless collaboration between remote teams.
- Provided internal IT training on security best practices and system usage, ensuring compliance and efficiency across teams.
- Managed IT operations during Vendr's scale-up, including hardware provisioning, onboarding, offboarding, and asset management.
- Ensured system compliance and conducted regular audits to ensure security across the company.
- Collaborated with C-level executives to align IT strategy with company objectives during the scaling process and through multiple rounds of layoffs.
- Led disaster recovery planning, preparing the organization for potential outages and system failures.
- Streamlined internal IT processes, improving team efficiency and reducing manual tasks through automation.
- Administered **Slack** and **Zoom** for company-wide communications and remote collaborations, enhancing productivity.
- Oversaw device security for remote employees, ensuring proper provisioning and management of hardware.
- Conducted periodic audits of software and licenses, reducing unnecessary SaaS spending and ensuring compliance.

- Provided technical guidance for system upgrades, improving IT infrastructure to support growing business needs.
 - Worked closely with HR and PeopleOps teams to ensure smooth IT support for the entire employee lifecycle.
-

Blissfully (Acquired by Vendr) | July 2021 – August 2021

IT Manager

- Led **SOC 2** compliance at Blissfully, managing the audit process and ensuring successful certification pre-acquisition.
 - Managed **Jamf Now** for device management, ensuring security and compliance across all employee devices.
 - Implemented **Okta IAM**, streamlining user access controls and automating onboarding and offboarding procedures.
 - Conducted internal audits to prepare for the acquisition, reviewing all IT systems and ensuring infrastructure readiness.
 - Provided IT support to all employees, managing help desk operations and troubleshooting system issues.
 - Led customer training and implementation sessions for **Blissfully's** SaaS platform, ensuring smooth client onboarding and tool adoption.
 - Coordinated device provisioning and inventory management, ensuring proper hardware setup for employees.
 - Managed SaaS audits, optimizing tools in use and preparing the company's IT infrastructure for Vendr's acquisition.
 - Conducted system security reviews and prepared IT documentation to streamline the post-acquisition process.
-

Granular | August 2019 – July 2021

IT Manager (Promoted)

- Managed the full IT infrastructure for Granular, leading the team in a move from a small office to a new space across two floors, supporting 150 people.
- Led all network setup, equipment installation, and IT logistics during the company's office relocation.
- Implemented **Okta IAM** for access management, streamlining user access across the organization and improving security.
- Deployed **SentinelOne** for endpoint security, enhancing the company's defense against cyber threats.
- Managed **Jamf** for Apple device management, ensuring security and compliance across the company's Mac devices.
- Administered **Google Workspace**, **Slack**, and **Zoom**, supporting remote and in-office collaboration.
- Conducted hardware provisioning, swaps, and repairs, ensuring timely support for employee devices.
- Managed over 100 SaaS applications using **Blissfully**, optimizing licenses and removing unused or redundant tools.
- Hired and managed an IT support team, providing day-to-day support for employees and resolving help desk tickets.

- Led the IT team in scaling support operations to meet the growing needs of 300+ employees.
 - Coordinated with HR to ensure IT systems supported seamless onboarding, offboarding, and employee transitions.
 - Led internal security audits, addressing vulnerabilities and ensuring compliance with security protocols.
 - Conducted IT training sessions for employees, educating staff on security protocols and system usage.
 - Developed disaster recovery plans and managed system backups, ensuring business continuity during potential system failures.
 - Managed IT infrastructure projects, including network setup and device security implementation.
 - Provided system upgrades and migrations with minimal disruption to daily operations.
 - Administered company-wide SaaS management, identifying inefficiencies and reducing software spend.
 - Managed vendor relationships and negotiated contracts for IT services, hardware, and software procurement.
-

Percolate by Seismic | October 2018 – August 2019

IT Systems Manager

- Conducted a comprehensive SaaS audit, reducing applications from 300 to 100 and streamlining tool usage.
 - Managed **Okta IAM** for identity management, improving access control for all employees.
 - Administered **Jamf** for Apple device management, ensuring compliance and security across company devices.
 - Provided IT support using **Zendesk**, resolving help desk tickets and supporting 200+ employees across multiple offices.
 - Administered **Google Workspace** and other collaboration tools, ensuring seamless remote communication.
 - Led internal security audits to identify vulnerabilities and improve system security.
 - Managed hardware provisioning and asset inventory, ensuring timely delivery and proper tracking of all devices.
 - Automated IT processes for employee onboarding and offboarding using **Okta**, improving efficiency and reducing manual effort.
 - Supported AV setups for internal meetings and company-wide events, providing technical assistance.
 - Led system upgrades and infrastructure improvements, ensuring minimal disruption during transitions.
 - Managed relationships with IT vendors and coordinated hardware and software procurement.
 - Developed internal IT documentation to improve processes and knowledge sharing across the team.
 - Led regular IT training sessions to educate employees on system use and security best practices.
 - Conducted system monitoring and managed network security to ensure protection of company data.
-

Prologis | Mar 2018 - Oct 2018

Information Technology Consultant

- **Identity and Access Management:** Administered identity and security access for user accounts across various systems and applications, covering onboarding, offboarding, and managing incidents/problems related to access entitlements.

- **Executive-Level Support:** Provided desktop support for key personnel in a Windows 10 environment.
 - **Access Provisioning and Troubleshooting:** Involved in resolving issues related to access management and provisioning workflows, including handling privileged access management.
 - **Video Conferencing Management:** Managed video conferencing hardware and software, specifically Polycom and Crestron setups.
 - **ServiceNow Ticket Management:** Oversaw ticket management via ServiceNow, tracking and resolving IT-related issues efficiently.
-

College Track | Sep 2017 - Mar 2018

Information Technology Consultant

- Conducted systems audit and strategic recommendations for current systems, including Okta, Google Workspace, Jamf, Zoom, and Oomnitza.
 - Standardized workflows, policies, and equipment.
 - Managed internal ticketing on Zendesk, handling IT-related inquiries.
 - Defined and developed an MDM strategy for Mac devices using Jamf.
 - Supported system integration and management for Okta, Google Workspace, Jamf, Zoom, and Oomnitza.
 - Optimized user access controls, enhancing security.
 - Managed vendor relationships and IT asset management.
 - Provided ongoing IT support, training, and troubleshooting to staff.
-

PresenceLearning | July 2015 – September 2017

Systems Administrator

- Managed IT infrastructure and support for telehealth and tele-education services, ensuring HIPAA compliance.
- Implemented **Okta IAM** for identity management, improving access control and streamlining user management.
- Administered **Google Workspace** and **Zoom**, enhancing communication and collaboration across teams.
- Managed **Jamf** for Apple devices, ensuring device compliance with HIPAA and internal security standards.
- Conducted regular system audits and security reviews to ensure compliance with telehealth industry standards.
- Led the setup of IT infrastructure for new offices in San Francisco and Utah, including network and hardware setup.
- Managed SaaS applications and licenses, optimizing usage and ensuring compliance.
- Provided day-to-day IT support, troubleshooting technical issues and managing help desk tickets.

- Managed hardware provisioning, ensuring timely delivery and proper configuration of employee devices.
- Developed IT documentation and procedures to improve system management and employee onboarding.
- Led system upgrades and migrations, ensuring minimal disruption to operations.
- Implemented disaster recovery plans and backup solutions to ensure business continuity during system failures.

Skills

Skill	Level of Understanding	Summary	Used At (# of Jobs)
Okta IAM	Expert	Purchased, implemented, and managed Okta IAM for identity management, user provisioning, and MFA across multiple companies.	4 (Vendr, Granular, Percolate, PresenceLearning)
Google Workspace Administration	Expert	Managed user access, security settings, and integration of Google Workspace across multiple teams and businesses.	4 (Vendr, Granular, Percolate, PresenceLearning)
macOS/Windows Support	Advanced	Delivered technical support for macOS and Windows systems, handling hardware setup, troubleshooting, and maintenance.	5 (Vendr, Granular, Percolate, College Track, PresenceLearning)
SOC 2 Compliance	Advanced	Led SOC 2 compliance initiatives, ensuring successful certifications through detailed process management and security protocols.	1 (Blissfully)
SaaS Management	Expert	Managed SaaS applications for user access, security, and compliance, covering up to 180 SaaS tools, optimizing usage and costs.	3 (Vendr, Granular, PresenceLearning)

Device Management (MDM)	Advanced	Managed devices through Jamf and Kandji, overseeing provisioning, software updates, and security patches across company devices.	4 (Vendr, Granular, Percolate, PresenceLearning)
User Onboarding/Offboarding	Expert	Automated onboarding/offboarding workflows to enhance security and compliance while reducing manual processes.	4 (Vendr, Granular, Percolate, PresenceLearning)
Multi-Factor Authentication (MFA)	Advanced	Implemented MFA across multiple businesses to strengthen security protocols and prevent unauthorized access.	4 (Vendr, Granular, Percolate, PresenceLearning)
Security Audits	Advanced	Conducted regular security audits to ensure compliance with both internal and external security standards.	3 (Vendr, Granular, Percolate)
Automation of IT Processes	Advanced	Automated key IT processes like provisioning, software deployment, and updates, improving overall efficiency and response times.	3 (Vendr, Granular, Percolate)
Access Governance	Expert	Developed and enforced least privilege access policies, ensuring secure access and compliance in IAM environments.	3 (Vendr, Granular, Percolate)
Team Leadership	Advanced	Managed and mentored IT support teams, ensuring successful project delivery and high-quality technical support.	1 (Vendr)

Vendor Management	Advanced	Managed relationships with vendors for IT services, including contract negotiations and service delivery improvements.	3 (Vendr, Granular, PresenceLearning)
IT Infrastructure Scaling	Advanced	Led infrastructure scaling efforts, particularly during rapid growth phases, ensuring stability and scalability of systems.	2 (Vendr, Granular)
Training & Documentation	Advanced	Developed IT documentation and training programs for internal teams to improve system understanding and compliance.	4 (Vendr, Granular, Percolate, PresenceLearning)
Network Management	Advanced	Coordinated network setup, configuration, and troubleshooting during office expansions, ensuring stable connectivity for users.	2 (Granular, PresenceLearning)
Help Desk & User Support	Expert	Managed help desk support across IT systems, handling day-to-day technical troubleshooting and user inquiries.	4 (Vendr, Granular, Percolate, PresenceLearning)
SentinelOne Deployment	Advanced	Deployed SentinelOne for endpoint protection and security monitoring, enhancing overall system security.	1 (Granular)
Zoom & Video Conferencing Support	Advanced	Led deployment and user training for Zoom and video conferencing systems across businesses to ensure effective collaboration.	3 (Vendr, Granular, PresenceLearning)
